Tiruttani

CAREER OBJECTIVE

Motivated developer seeking to contribute to a growing organization while expanding my technical skills. Eager to take on challenging projects, adapt to fast-paced environments, and deliver reliable solutions.

EDUCATION

01/2021 - 01/2025

Tiruchengode, TamilNadu

• BE - CSE
K.S.R College of Engineering
· CGPA - 7.77(Out of 10)

06/2020 - 05/2021

Anthiyur, TamilNadu

• HSC
Adharsh Vidhyalaya Metriculation Higher Secondary School
· Percentage - 89.07%

06/2018 - 05/2019

S.V.G Puram, TamilNadu

• SSLC
Vethathiri Maharishi Higher Secondary School
· Percentage - 82.6%

SKILLS

Framework: Flutter

Languages: Java Dart Html Css Javascript

Database: Firebase MongoDB

State Management: GetX Provider Bloc

Backend Deployment: Render

Version control: Git Github

Experience

Mobile & Web Application Intern | Brix Networks Private Limited

June 2025 - Present

- Collaborated on cross-platform application development, focusing on modular architecture and clean state management.
- Built and optimized functional application modules, integrating backend services and ensuring reliable performance.
- Participated in the complete development lifecycle, from initial feature drafting to local testing and deployment.

PROJECTS

Bookymet(Turf Booking App)

Developed a scalable Flutter application that connects sports enthusiasts with local turf venues. Built a comprehensive multi-tenant architecture supporting separate flows for Users (searching, booking, and loyalty rewards), Turf Owners (financial analytics and venue management), and Managers. Leveraged Firebase (Firestore, Cloud Functions, Auth, Messaging) for real-time data sync and secure operations and utilized Google Maps for location-based discovery.

Autenik(ERP Platform)

Architected a cross-platform Enterprise Resource Planning (ERP) platform in Flutter to digitize and centralize core HR workflows. The system unifies the employee lifecycle by integrating geolocation-backed attendance, dynamic leave management, automated payroll processing, and collaborative Kanban task boards. Powered by a serverless Firebase infrastructure and GetX state management, the application utilizes custom PDF generation and advanced data visualization tools to deliver actionable insights and streamline administrative overhead.

Expense Tracker

Architected and developed a premium Expense Tracker using Flutter and Dart, leveraging Clean Architecture to create a modular and testable codebase. Successfully managed complex state across multiple features (Budgeting, Analytics, Auth) using BLoC. Delivered a high-performance web experience (optimized for WASM) with a custom-built design system and local-first persistence via Hive.

Certifications

- Certification in Android Application Development – Internshala Learning Platform
- Flutter Framework Certification – Great Learning Academy
- Elite Certification in Cloud Computing – NPTEL / SWAYAM
- Google Play Store Listing Certificate – Google Play Academy
